and International Cooperation

Sustainability is **SustainabITALY**

Italian orthodontics manufacturers are among the first suppliers to the UAE dental market with nearly 40 million euro worth of dental products exported to the Emirates in 2022 .

The Italian dental industry is one of the most important in the world in terms of annual turnover – 1.3 billion Euro-, technological innovation and export. Exports are estimated at around 860 million euro (2021) with an average annual growth rate of 6%, and an overall development of exports of 80% from 2011 to 2022.

The Italian dental industry has confirmed its leadership on the international markets thanks to a production system appreciated throughout the world for the reliability of its components, the cutting-edge technological solutions and the very pleasant design.

Oral health professionals around the world are increasingly recognizing the need to provide care in a manner that minimises the impact on the environment and are already making sustainability a high priority by using more environmentally friendly dental supplies and equipment, or by making structural, energy-efficient changes to their clinics.

CO2 emissions, plastics use, waste generation and other environmental impacts are major challenges at all levels of the dental resource supply chain as well as in care delivery.

Dental manufacturers are developing solutions to help reduce the environmental impact of dentistry including the creation of biodegradable disposable products or of products that can be easily reused or recycled.

The Italian Trade Agency (ITA) **together with UNIDI (Italian Dental Industries Association)** is presenting a selection of Italian dentistry manufactures at AEEDC with the motto “Sustainability is SustainabITALY”. ITA wants to lead the change and invite the Italian exhibitors hosted in the Italy Pavilion to take action towards a more eco-conscious approach.

Italian Trade Agency - ITA

TRADE AND INVESTMENT

OPEN DOORS TO A WORLD
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

UNIDI

Italian Dental Industries Association

UNIDI – The Italian Dental Industries Association – gathers most of the Italian manufacturers of equipment and consumables for dentists and dental technicians, more than 130 companies providing all the guarantees to the users of their products, by complying with the safety and performance requirements laid out by the EU legislation.

In 50 years of activity, UNIDI has actively contributed to the growth of the Italian dental industry. Today the association is one of the world leaders, regarding business volumes, technological innovation and exports.

UNIDI promotes Made in Italy through two important events: Expodental Meeting in Rimini, the most relevant international trade-show for the dental sector in Italy; and IDEA – International Dental Exhibition Africa, the only international exhibition for dental professionals in all African Countries.

Moreover, UNIDI sustains Italian companies export strategies, by organizing Italian pavilions, creating business matches, and drafting an important internationalization plan in cooperation with ICE – the Italian Trade Agency - in both emerging and industrialized Countries.

ANDREW MEDICAL

Andrew Medical, a pioneering startup, specializes in the research, development, and production of 3D Printed Dental Implants. These implants, crafted from titanium Ti6Al4V-ELI, boast a root form shape with a dense core and an outer porous layer that encourages bone growth. This design mimics natural bone structure providing a 3D volume, going beyond the ordinary traditional 2D surfaces. The implant's conical connection system and platform enhance performance.

In vitro studies show that the implant's surface influences bacteria interaction, potentially preventing peri-implantitis and device infections. Its 3D-printed titanium structure promotes Dental Pulp Stem Cell (DPSC) adhesion and osteoconductivity. Tests reveal that its interconnected pores, similar to bone's internal structure, improve cell adherence and osteogenic properties. The surface design and post-production treatments significantly impact DPSC's adhesion and bone-forming potential. Andrew Medical provides these advanced implants along with a comprehensive range of instruments and accessories.

ARIES

ARIES was established in 1989 and after gaining ground in the sector of furniture for dental technician laboratories, it started designing furniture lines for dental practices under the lead of the founder's son Giampaolo Adda and his wife as well as the architect and designer Silvia Polver, who designs all models.

In addition to the 5 lines of furniture for the dental office and a complete range for the dental laboratory, ARIES in recent years has studied and created a dental simulator for universities and training centers.

Today ARIES exports about 70% of its furniture to the following geographical areas: EC, UK, Russia, North and Middle Africa, Gulf Countries, Japan and South America.

The leading position on the international market with top quality furniture characterized by careful design and visible ergonomic features is devoted to those professionals who are looking for excellence in terms of functions and image.

CONCEPT

CONCEPT produces zirconium oxide discs in Italy, in Busseto, under trade name Zyttria® using exclusively the “single cip” isostatic technology in order to obtain products with high technical and aesthetic performance.

The discs are produced in ten different zirconia: pure white, pre-colored zirconia and multi-layered “3D” zirconia characterized by progressive color intensity, translucency and mechanical resistance from dentin to enamel, as occurs in natural tooth tissue: final result is achieved with fewer and easier steps with a significant saving of work, time and manufacturing costs.

FIFTHINGENIUM

FifthIngenium is a company focused on developing eXtended Reality solutions for the Education and Dentistry industries.

ObiScanner is a new generation Face Scanner, specifically designed for Digital Dentists looking for a way to acquire a 3D model of the patient's face in just 10 seconds. The technology is completely safe, unharmed and the resulting 3D model is compatible with any dental CAD software on the market.

HoloDentist allows doctors and professionals to recreate the Virtual Patient by combining and visualizing all the 3D data in eXtended Reality (XR). Using holograms and XR, doctors can display, manipulate, share files locally or remotely and make real-time videocalls with collaborators in just a few clicks.

With voice commands, gesture recognition and holographic projection, using HoloDentist and eXtended Reality is easy. The operator can handle tools while projecting on a virtual layer the patient's 3D information, such as CBCTs, intra-oral scans, face scans, implants, bones, etc.

G.COMM

G.COMM designs, manufactures and distributes professional lighting systems for dental and medical practices, as well as bleaching lights, simulators, support arms and components.

What sets us apart? We are close to doctors: thanks to our personal interaction with dentists, we have been able to incorporate in our products the needs and desires of professionals.

In 2007 we developed our Light Polaris to prevent eye strain thanks to the light settings that can be adjusted according to the practice needs. Choice of materials, product specifications and style are also inspired by our customers' requirements. We are proud of being a manufacturer, we run the whole production cycle in our facilities.

G.COMM has an international calling. Our worldwide customers appreciate the attractive design of "Made in Italy" products and our concepts, which combine innovation with strong expertise in optics, electro-mechanics and digital technology. The revolutionary Iris View, our lamp with built-in video-camera, stems from these values.

RHEIN83

Rhein83 is highly specialized in the production of dental attachments.

Currently offering the widest range of solutions in overdenture on natural teeth, partial denture, implantology and cad-cam. The versatility of the new OT Equator System allows the dentist and dental technician to work with all different implant brands and systems spacing from removable to fixed prosthesis protocols.

Rhein83 presents the Ot Bridge technique. For all types of dental implants, including unknown ones! The real innovation behind the technique is the adaptability of the OT Equator abutment as a MUA component. The versatility of this solution is the chance to treat both removable and fixed restorations with the same narrow profile titanium abutment. This allows the professional to save materials, reduce the number of tools and working times both with traditional and digital techniques.

TEKNE DENTAL SRL

TKD has been a manufacturer of dental instruments since 1969.

To design and produce reliable high-precision handpieces has been our mission since the very first developed high-speed air-bearing turbine.

During the last few years, not only has TKD developed a few brilliant and innovative products but has also improved all the existing handpieces.

Whether it is a high-speed turbine or a low-speed motor, its necessary pneumatic and electric connections have been simplified. Efficiency and reliability have been increased to excellent levels. High-precision parts have been made much safer and wear-resistant.

Finally, connection of any handpiece to its supply silicone hose has been made smoother and simpler.

All this just helps us pursue our object of Simplifying dental motion.

Nowadays TKD exports its products to over 78 countries throughout the world.

We offer a wide range of high-quality and cost-efficient products and accessories for the practitioner and the dental industry.
