02

The get-e-right expertise

Proven partner of foreign producers in Germany and France

Acting as
Authorised Representative for:

- Electrical appliances
- Batteries
- Packaging
- Product safety
- as well as EPREL

Since 2015, get-e-right GmbH has provided the mandatory WEEE authorised representative in Germany for international producers without a German branch and has since rounded off the services of take-e-way with regard to the legal requirements of the amended ElektroG. In addition, get-e-right also offers the authorisation according to the BattG and the VerpackG. In addition, the solution for WEEE was extended to France in 2018. get-e-right is part of the e-systems group, which also operates its own academy for product compliance.

Authorised representative in
AT - who is obliged?

Authorised representative in AT - who is obliged?

04

Role of the authorised representative

Role of the authorised representative

Legal

- Conclusion of binding contracts on behalf of the producer
- Registration with the authorities
- Submission of quantity reports to the take-back system on behalf of the producer
- Representation towards authorities as contact person
- Assumption of liability pursuant to the Administrative Penal Act

Administrational

- The authorised representative acts in the interest of the producer in such a way that the legal requirements are fulfilled
- The authorised representative assumes the obligations of the producer and is thus the first point of contact for authorities in Austria
- Application of a comprehensive control and quality assurance system
- Conclusion of contracts and data exchange with take-back systems
- Cooperation with authorities and coordination bodies during audits

05

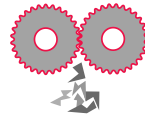

The get-e-right solution

AR registration, notification, control and quality process

Foreign producers apply for a **registration in AT**, according to a standard process based on the respective waste stream (WEEE, Batteries, Packaging) and details of the product portfolio.

The **initial risk assessment and qualification** is being carried out by take-e-way to identify subsequent enforcement risks and ensure a smooth registration and monitoring process.

The producer appoints **get-e-right as authorised representative**. All relevant documents are provided and allow a quick and smooth registration process.

Based on the get-e-right **power of attorney process**, certification of the correctness and credibility of all documents.

The **further registration process** is being carried out by take-e-way as a vicarious agent according to standardised procedures with the ARA and, in future, also with the coordinating bodies.

The **take-e-way Customer Online Portal (monthly reporting)** offers the optimal platform for both the producers (reporting, plausibility check, archiving and reminder function) and the authorised representative (monitoring, checks).

=> get-e-right terminates the representative service in case of missing reporting and lack of cooperation!

The get-e-right service package in cooperation with take-e-way

- take-e-way reporting platform
- standardised registration and reporting processes
- EDI with ARA / ERA in preparation
- auditable interface

- plausibility check (QA)
- continuous flow of information / training through take-e-way (academy)
- support with official audits

- digital importers' declaration
- continuous support in the process
- reporting to systems

- automated validation (plausibility check)
- digital corrections of reports
- reporting to the systems by take-e-way

Our offer
