# ITALY @ WETEX 2021

SUNDAY 3 OCTOBER 2021

## ITALIAN COMPANIES BRING LATEST INNOVATIVE SOLUTIONS THAT TACKLE CURRENT CLIMATE CHALLENGES AT WETEX 2021

This year marks the largest presence of Italian companies ever at the leading Water, Energy, Technology, and Environment Exhibition (WETEX), with 55 companies travelling to the UAE for the three-day event, taking place from 5 to 7 October 2021.

The Italian companies will be housed inside the Italian Trade Agency (ITA) pavilion at the water section in the north hall NB 22 - NC 42, located at the new Dubai Exhibition Centre within the EXPO 2020 Dubai site.

Integrating components of the ecosystem, ITA facilitates trade opportunities, technology transfer, and showcases the latest innovations from Italian SMEs and startups – all in line with Italy's National Sustainable Development Strategy to implement the UN 2030 Agenda and achieve the sustainable development goals.

Italy is Europe's second largest manufacturer and the world's sixth exporting country of technologies used exclusively in renewable energy sources. Italy's renewable components export towards UAE increased by 11% in the first half of 2021. It has even increased for almost 4% compared to 2019, before the global pandemic started. This year promises to be a year of redemption for the Italian companies in the sector.

Among the most requested products in the UAE (including pumps, pressure reducers and components for solar panels) have experienced a surge in requests for the first semester 2021.

**55**

Italian exhibitors at WETEX 2021. Out of which, 40 SMEs are housed in the ITA pavilion.

**#2**

Italy is the second largest manufacturer of technologies used in renewable energy sources in Europe

**11%**

increase of renewable energy components exported to the UAE in H1 2021 vs H1 2020

## SAVE THE DATE

On the occasion of Expo Dubai, ITA - ITALIAN Trade Agency in collaboration with the Embassy of Italy, the General Consulate and the Italian Commissioner's Office of Italy Pavilion, organizes an extensive programme of initiatives to promote Made in Italy and Italian companies in the UAE.

## Recycling for a sustainable development: the Italian proposal

7 October 2021 | 3:30 pm

Italy Pavilion at Expo Dubai

The Innovation Talk intends to offer a focus on Italian innovations. A roundtable between Italian and prominent Emirati stakeholders will discuss sustainability issues and environmental and economic impacts of the most advanced technologies on the following: **land protection and soil remediation technologies, water efficiency, engineering circular economy, decarbonization, sustainable mobility.**
