MARKET SURVEY NOTICE

SUBJECT: REQUEST QUOTATION FOR INTERNET BANDWIDTH (FIBER OPTICAL)

COAN: S200W00000

Pursuant to art. 36, paragraph 2, lett. b) of Legislative Decree 50/2016 and amendments, along with Guidelines n. 4, issued by the ANAC as per Legislative Decree 18 April 2016, n. 50, entitled "Procedures for the awarding of public contracts below the EU thresholds, market surveys and training and management of lists of economic operators" (Resolution No. 1097 of 26 October 2016), and under Legislative Decree 19 April 2017, n.56, ITA intends to have an offer from your good company for the supply of Internet Bandwidth

The Company shall be responsible for internet bandwidth connection of all of Italian Trade Agency – Amman Office - out-of-. The following technical services shall be furnished by the company:

The supply must consist of the following elements:

- connection bandwidth between the office and the ISP calculated based on the number of workstations in the office itself (approximately 0.5Mbps -1Mbps per workstation) max 200Mbps;

No. of workstations ITA Amman office: 9

(in the case of connections that provide for CIR Committed Interchange Rate - guaranteed bandwidth, this must be indicated in the offer and must not be less than half of the total band);

- supply of 2 static IPs (always the same for each connection) without "NATTING";
- supply on loan for use of a router and a modem suitable for the connection provided for connecting the local office network to the line made available by the ISP;
- provision of a dedicated line or, alternatively, of an XDSL connection (without prejudice to the need to have static IPs available) for connecting the office headquarters to the ISP access point, not in shared mode (i.e. a direct connection); normally these lines (so-called local queues or local loops) are made available by local national telephone companies;

the ISP will have to make its offer including the cost of these lines and will take care of all the administrative activities to be carried out (questions, certification, activation, etc.) towards the aforementioned National Telephone Companies;

- availability of the access statistics of the acquired connection, these statistics must be made available electronically.

The ISP will need to specify the following service levels:

- service availability (not less than 99.96% on an annual basis);
- response time help desk (called back no later than 1 hour from the opening of the problem);
- problem resolution (no later than 4 hours from the callback).

Any penalties, where possible, will be agreed by the office.

The ISP must make active, for the addresses made available to the office, the IPSEC and IKE protocols (protocols 50 and 51 of the IP and port 500 of the UDP) and must provide in advance all the static IP addresses made available and relative DNS addresses of the provider. Furthermore, the SNMP protocol must be made available and always active.
